*To create, one
must first question
everything.* — Eileen Gray, architect and artist

In 1979, in the heart of San Francisco, two European visionaries — Anthony Pontin and Norman Bell — embraced the revolutionary era's zeitgeist: to challenge convention. In place of the white and chrome that commonly characterized bath fixtures, they introduced a new approach to plumbing design that celebrated the creative melting pot of their adoptive city, and America. They proposed beautiful, handcrafted products that blended superior quality and expressive materials with varying styles that spanned generations and ideologies. With this visionary audacity, KALLISTA was founded, and American Contemporary was born.

SINK FAUCET IN GUNMETAL

American Contemporary

More than a manifesto, American Contemporary is an eclectic, ever-evolving artistic style reflective of the country's multicultural character. It's the aesthetic expression of a dynamic discourse between generations of artists who have come here from all over the world to assert their individuality and test their philosophies without censure.

Though its origins stretch back beyond recorded history, American Contemporary tangibly stamped its philosophy on early 20th-century New York City, where the rise of Neo-Renaissance buildings signaled the intentional intersection of past and future, Old and New Worlds. This movement's bold idealism opened the creative floodgates for similarly enlightened expressions, such as Art Deco and De Stijl.

Though chronological in their arrival, the divergent movements are not connected by a linear thread. Rather, they weave the increasingly complex, exponential web that differentiates American Contemporary style. Today, it intertwines everything from Minimalism to Art Deco and beyond to introduce innovative artistic statements with infinite possibilities.

Our Designs

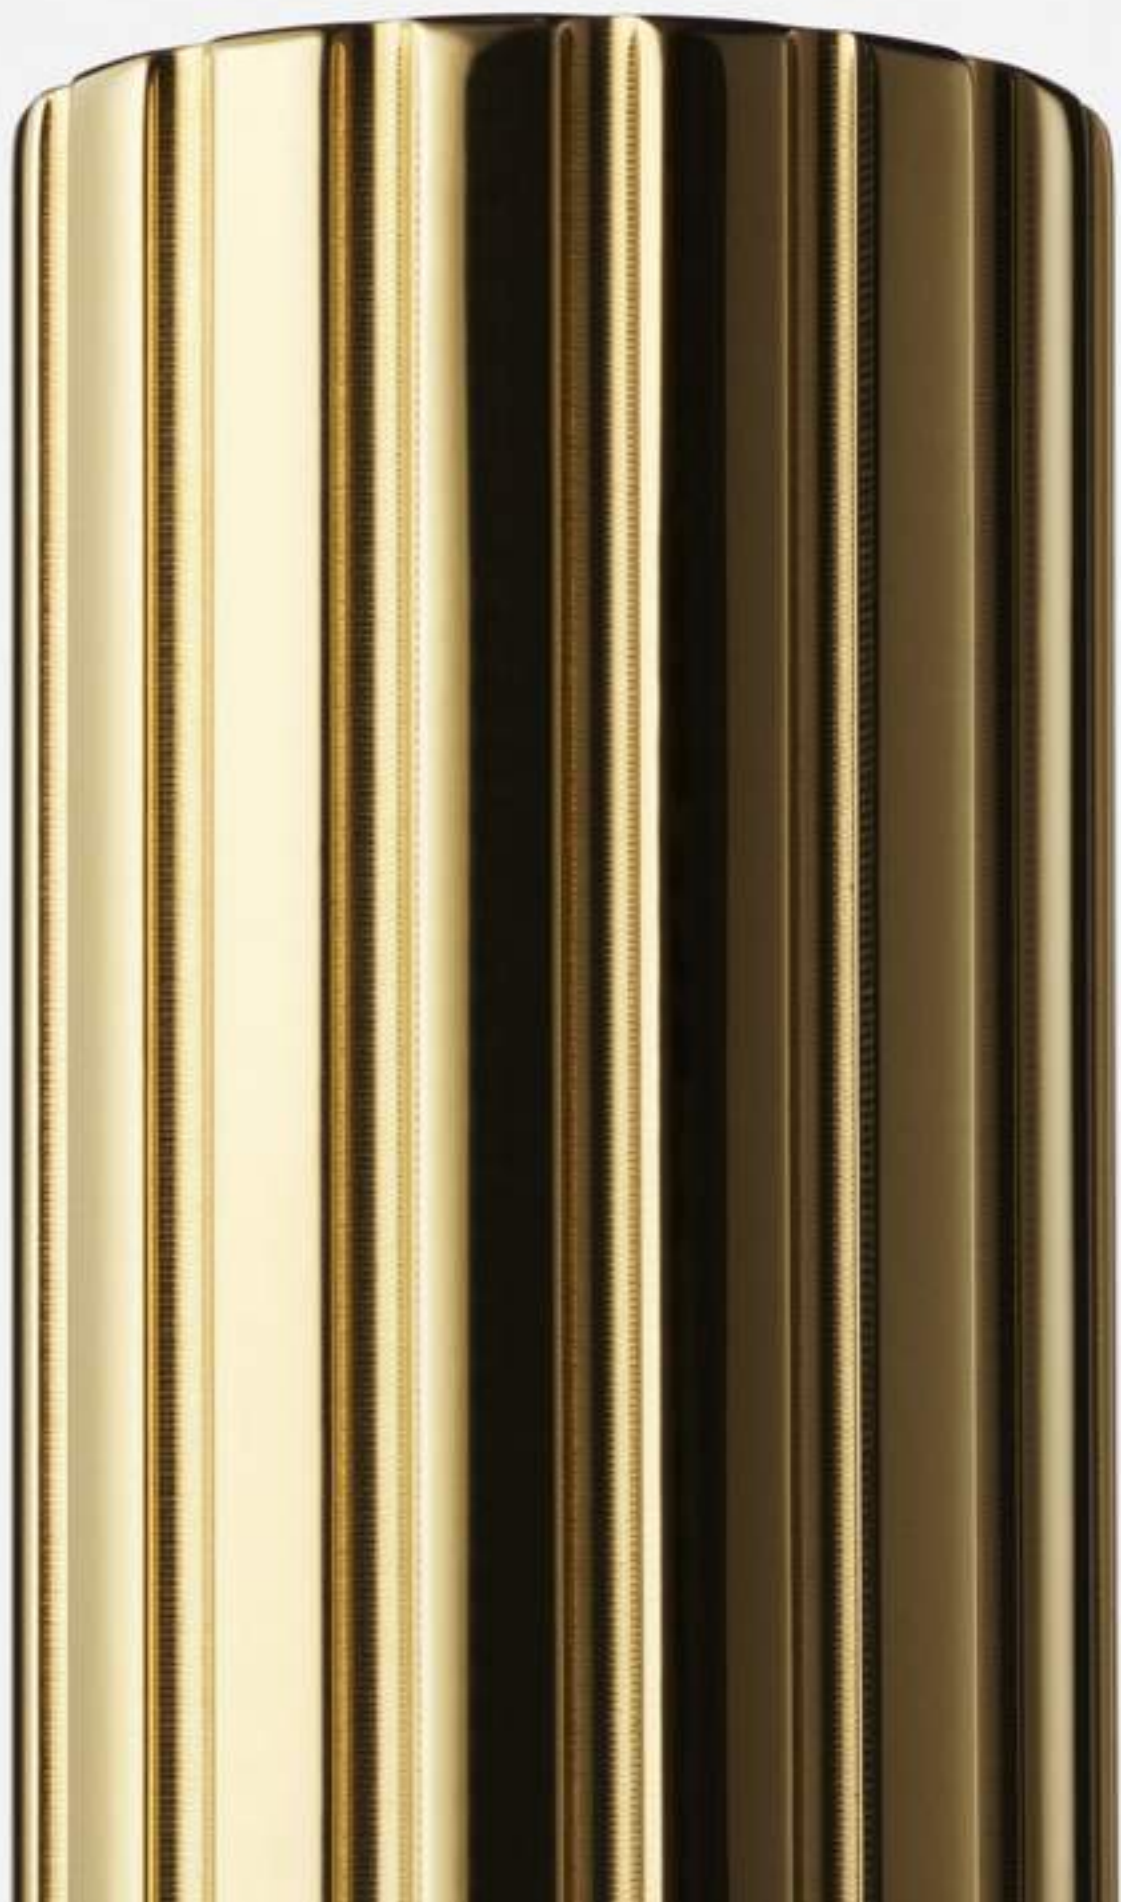

American Contemporary is the vital thread that binds KALLISTA designs. Our original utilitarian artworks combine European inspiration with traditional American design and emerging global influences to celebrate our vibrant creative melting pot.

Just as each corner of the United States is diverse, so too is each KALLISTA design. Some pay singular tribute to the idiosyncratic characters of the country's great cities and the visionaries who shaped them. Others intentionally converge classic aesthetics with present-day innovations. All perfectly embody this tension: They are contemporary yet timeless in design, and each stirs a unique emotion. Their uncommon contours convey a mood, an aesthetic, and a distinct ethos.

Together, KALLISTA designs speak a cohesive, refined, human design language that replaces dogma with a progressive commitment to the art of personal expression – and the ambition to ignite desire.

Neo-Renaissance

Neo-Renaissance

Emery Roth, 65 Central Park West, 1926, New York City

Harmony, Grandeur, and Geometry

One of nine landmark buildings on Central Park West designed by famed architect Emery Roth, 65 Central Park West epitomizes its era, yet remains a timeless design icon. Its formation coincided with the creation of the Eighth Avenue subway line, and its goal — as one of the area's first luxury apartment buildings — was to signal a new superlative lifestyle to the city's upper class, who had previously resided primarily in standalone homes. Roth achieved this remit by marrying harmonious, humanist Neo-Renaissance philosophies with vertical lines, symmetric geometries, and stylized motifs at an impressive scale.

The iconic structure and its clean, classical silhouette continue to distinguish the city's skyline and embody the sophisticated, forward-looking era that inspired our Central Park West™ Collection by Robert A.M. Stern Architects.

BELLIS NOBLE SINK
FAUCET, CROSS HANDLES
IN UNLACQUERED BRASS

Traditional styling, considered details, and radiant finishes reveal the inspiration behind our Bellis collection: the classical opulence of 1920s interior design in America. Pairing European traditions with future-looking optimism, its versatile form elevates myriad environments.

UNLACQUERED BRASS

With its distinct texture and one-of-a-kind hue, our Unlacquered Brass finish transmits a tangible patina effect that defines each fixture as truly unique – and adds warmth and tactility to both modern and traditional interiors.

Minimalism

Minimalism

Frank Stella, "Black Study I," 1968, New York
©2023 Frank Stella/Artists Rights Society (ARS), New York

Precision, Geometry, and Materiality

In contrast to the romantic philosophies of the art movements that preceded it, Minimalism championed the literal physicality of an artwork: its scale, placement, materials, and weight. Paired with extreme geometric abstraction, Minimalist artworks claim to pose a narrative devoid of symbolic meaning. As Frank Stella stated of his work, “What you see is what you see.” Among the defining artists of the Minimalism movement, Stella proposed pictures as objects, rather than representations of something.

Stella’s hypothesis reached its height in his Black Series I prints, Black Paintings, and subsequent Black Study series lithographs. With their uniform rectilinear stripes, the works possess an optical pattern that attempts to force all illusion out of them. Yet Stella himself admitted that the subtle appearance of the artist’s hand leaves space for interpretation — a conclusion corroborated by our elemental yet elegant One™ Collection.

Collection Overview

De Stijl

De Stijl

Piet Mondrian, "Composition II With Red, Blue, and Yellow," 1930, Zurich ©2023 Mondrian/Holtzman Trust.

Minimalism, Abstraction, and Universality

As a co-founder of the De Stijl movement, artist and philosopher Piet Mondrian believed deeply in the power of abstraction to communicate universal values and create universal beauty. Over time, his pursuit of this purist language condensed his artistic vocabulary to primary colors and straight lines. His painting "Composition II With Red, Blue, and Yellow" expresses this philosophy at the peak of its radical simplicity.

Rejecting all naturalistic and figurative forms, the work focuses solely on the interaction and balance of its rectangles and minimal color placement to paradigm-shifting ends — as underscored in our Grid® collection.

Grid

by KALLISTA

GRID CUBE HANDLE
IN MATTE BLACK

A tribute to the De Stijl movement, our Grid collection harnesses the visual impact of geometric lines and negative space, stripping away the confines of traditional design to expose the intrinsic beauty of simplicity.

GRID WALL-HUNG CONSOLE IN MATTE BLACK

GRID SINK FAUCET, 3D-PRINTED SPOUT IN MATTE BLACK

In traditional faucet design, form follows function. Our Grid collection is the opposite: Its aesthetic determined its manufacturing method, as 3D printing was the only possible way to move water through this minimal, geometric outline.

Collection Overview

Art Deco

Art Deco

Eileen Gray, Screen, 1923, Paris ©Victoria and Albert Museum, London.

Geometric, Symmetric, and Decorative

Perched on the cusp of tradition and modernity, the Art Deco movement operated on the principle that any object — no matter how humble its purpose — could be transformed into art through decorative application. This exceptional meeting of establishment and invention defines the influential oeuvre of Eileen Gray. Equally renowned for her architecture and furniture, Gray possessed an autograph style that played a seminal role in establishing Art Deco and evolving it toward Modernism.

Her series of iconic screens exemplify this quality with their geometric lines, symmetry, meticulous details, and striking silhouettes. With their considered balance of ornamentation and polished restraint, they serve as an artistic predecessor to and influence on our Per Se® collection.

GOLD FLAKE CRYSTAL HANDLES IN BRUSHED FRENCH GOLD

Per Se

by KALLISTA

PER SE GOLD FLAKE
CRYSTAL HANDLES IN
BRUSHED FRENCH GOLD

Featuring soft, symmetrical lines and a modern, fluid form that elevates everyday objects to an ornamental stature, our Per Se collection draws inspiration from Art Deco’s foundational principles. Its standalone statement quality also validates its own name, “per se,” which is Latin for “in itself.”

Finishes

Our range of artisan-inspired finishes transforms each of our faucets and accessories into one-of-a-kind showpieces with exceptional durability, shine, and dramatic tactility. Take your pick from living and powder-coated finishes, or opt for our recently introduced physical vapor deposition (PVD) finishes*, which feature an advanced coating technique that bonds the finish to further enhance durability and color integrity, while resisting scratching, tarnishing, and corrosion.

A complex, multistep process prepares each of our fixtures for their finish: Faucets with polished surfaces are buffed, while those with textured surfaces are brushed to ensure any rough surfaces from the casting process are removed. All parts also go through several salt, ultrasonic, and hot rinses to ensure their finish adheres properly. And once the finish is applied, each piece is hand inspected, assembled, and tested by a Kallista team member before undergoing a final six-step quality test.

Our Partners

To celebrate our multifaceted heritage and actively evolve the language of American Contemporary design, we regularly partner with leading creative minds spanning an array of disciplines. From designers and architects to artisans and artists, we collaborate with these visionaries to reimagine aesthetic codes and create extraordinary expressions for the kitchen, bath, and beyond.

P.E. Guerin
One P.E. Guerin Collection

P.E. Guerin is the oldest decorative hardware firm in the United States, and the only metal foundry in New York City.

RAMSA
Central Park West™ Collection

Robert A.M. Stern Architects is a seminal New York City-based architectural firm founded by its namesake architect, educator, and author over 50 years ago.

Workshop/APD
Argile™ Collection

The award-winning New York City-based design and architectural firm Workshop/APD introduces a modern, contextual aesthetic that replaces signature style with each respective project’s sense of place.

Mick De Giulio
Juxtapose® Collection and Kallista kitchen sinks

An iconic American kitchen designer, author, and product designer, Mick De Giulio has been creating kitchens for distinctive residences throughout the United States and abroad for over 45 years.

Laura Kirar
Pinna Paletta®, Pure Paletta®, Vir Stil®, and Vir Stil® Minimal Collections

Laura Kirar is an internationally renowned interior designer, product designer, and sculptor who combines disciplines to create memorable interiors and collectable designs.

Champalimaud Design
One Nazaré® Collection

A New York City-based interior design studio, Champalimaud Design unites context and heritage to create compelling stories and unparalleled experiences.

Andre Kikoski
One™ Decorative Collection

The founder of an eponymous, New York City-based architectural firm, Andre Kikoski is known for his compelling designs spanning social and cultural contexts that blur the boundaries between art and architecture.
